

## Stemspark

StemRobo is a gateway to an exciting world of innovation and learning where students and educators can explore the fascinating concepts of stem (Science, Technology, Engineering and Mathematics) and AI Robotics.

Recognizing the pivotal role of stem and AI Robotics in shaping the future, our school has introduced a cutting-edge technology program to empower students with essential skills and knowledge for the students of std I to X as a part of their academic curriculum.

We are privilege to share that our teachers have undergone comprehensive training in AI and Robotics, equipping them with the expertise to deliver high quality education.

They are now ready to guide and mentor our students fostering a new generation of innovators and thinkers.
